R404 - STUDENTS WHO REQUESTED A SPECIFIC COURSE

This report can help you determine students who requested specific course, whether it's a Core Group Number (010103) or a real course id (EEARNA). This report can be generated until you lock in your Master Schedule (B105).

When you submit R404, you can enter the specific course id, core group numbers, or you can leave the field blank. If you leave the Courses field blank, it will list all courses, both real and artificial, and the students who have a request for that course. You can then add or delete course requests using REQU or CREQ.

Note: R404 will not list all the real courses under a Core Group Number. It will only list the Core Group Number and the students who have a request for that number.
